

Empowering Recruitment Agencies and Vendors through AI-Driven Collaboration by bridging the gap between talent requirements and vendor expertise with the power of Artificial Intelligence.

Managing multiple vendors and thousands of requirements shouldn't be a manual chore. RecruitX provides Recruitment Agencies with a centralized command center to orchestrate the entire sourcing lifecycle.

Why Choose RecruitX?

- **Speed**
Go from "Requirement" to "Shortlist" in record time with automated notifications and **AI scoring**.
- **Quality**
Eliminate "resume spam" by prioritizing candidates with high **AI match** scores.
- **Partnership**
Build stronger, more transparent relationships with your vendors through real-time feedback loops.
- **Versatility**
Whether you specialize in IT, Finance, or Healthcare, RecruitX adapts to your domain-specific needs.

Precision Onboarding & Distribution

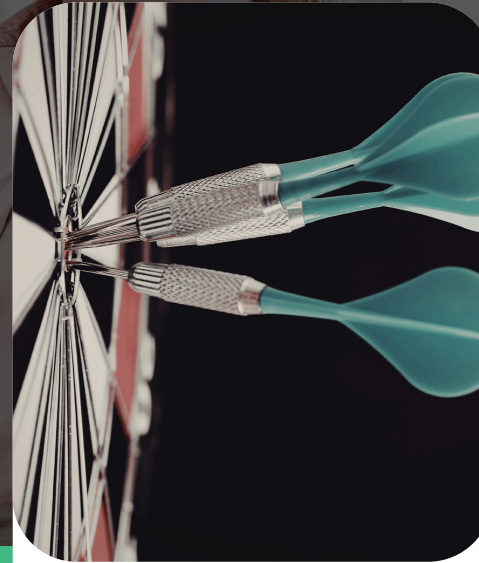

Strategic Vendor Onboarding

Onboard individual consultants or large-scale vendor companies. Categorize them by specialized domains like IT, Finance, Hospitality, and Insurance to ensure the right eyes see the right jobs.

Corporate Vendor Management

For vendor companies, designate specific contact personnel to ensure direct and accountability-driven communication.

Domain-Targeted Job Posting

Post complex requirements (e.g., Full-Stack Developer: Node, Nest, MySQL) to specific domains. Attach JD documents, technical assessments, or company profiles instantly.

Automated Intelligence

The moment you click 'Post', RecruitX takes over. We instantly alert qualified vendors and **Ai Agent** will auto-score every candidate upload for immediate, skill-matched insights.
